Community Engagement Policy

The Yard, Prees Heath, Whitchurch, Shropshire, SY13 3JX

Policy Purpose & Context

Our Community Engagement policy sets out why engaging with the community is important throughout our business and the principles that underpin good engagement with individuals, communities, and local businesses in the surrounding areas of all works we undertake.
McFour Ltd is committed to engaging with communities and this policy provides our commitment to enhance engagement across the work we do and in the communities we work.

Community Engagement?

For the purposes of this policy community engagement is the conversations that we have with people about areas that they live or how potential works we undertake may affect them. It is about providing support and engagement in local communities in a manner and way to enhance and improve them. This could be by providing charitable support, volunteering, or the provision of plant and equipment or labour and materials to local communities or projects. Nominated staff would facilitate the delivery of our Community Engagement.

The Importance of Community Engagement

Engaging with local communities is at the heart of all operations within McFour Ltd. We believe in the opinions and voice that the people who work with and for McFour Ltd have. We want individuals and stakeholders to be central in that journey, actively working together to help achieve our business and priorities with commitment, in a responsible and supportive manner in the areas that we work and engage in.

Our Policy Statement

This policy sets out our commitment for engagement that encourages a partnership of collaboration between communities, employees and stakeholders and McFour Ltd.
This Community Engagement policy sets out why engaging with the community is important and the principles that underpin good engagement with individuals, communities, and local businesses in the surrounding areas.
